

One Block Off the Grid

About 1BOG

One Block Off the Grid (1BOG) is the country's largest community-based initiative driving widespread adoption of renewable energy and sustainable solutions through education, community building and group purchasing programs. It's as simple as this: 1BOG organizes big groups of people together who want solar energy and gets them a serious discount!

1BOG's Solution

Homeowners looking to buy solar panels face a few problems: It's expensive, It's complicated, and they don't know which installer they should trust. 1BOG organizes people in a community to go through the process together. This process has several benefits:

- An organized community can buy solar in bulk, so 1BOG negotiates with installers to get impressive discounts for each homeowner in the collective.
- We make the process much more simple and painless, as well as use our deep solar energy expertise to educate consumers throughout the process.
- We offer safety in numbers, and unlike the installers themselves, our interests are always aligned with yours.

Safety in numbers, savings in numbers!

The more people sign up for the program, the bigger the savings and the better the terms we are able to negotiate with installers and manufacturers. Our goal is to get solar on more roofs, and that involves cutting the cost of your solar system significantly.

1BOG Campaigns

We have live campaigns in the San Francisco Bay Area, Sonoma County, Los Angeles, San Diego, Denver and New Orleans! 1BOG will launch a solar campaign in any community with enough participant interest. Check out www.1bog.org to sign-up!

1BOG Results and Testimonials

"A really fascinating program ... Get involved, get engaged."

-San Francisco Mayor Gavin Newsom

Over 12,500 1BOG sign-ups nationwide

"Not only is the 1BOG model a brilliant one to get more solar on more homes, they made the process easier and cheaper."

- Susan, San Francisco

Achieved discounts of 15-20% off market rate with comprehensive financing options
